

CASE STUDY

Enclosure Solutions, Inc.

Enclosure Solutions, Inc. is located in Kingwood, Texas. The company provides office and warehouse units built to their client's specifications. One of their main concerns was that each unit should have an easy to maintain floor coating. When leases are due Enclosure Solutions will always have inviting spaces to offer.

We offered a polyaspartic system for its ability to penetrate into the concrete up to 1/8 inch deep. This coating can be applied at temperatures as low as -20°F to as high as 140°F. It can be installed in as little as one day and is available in any color. This advanced performance system is both UV resistant as well as impact and abrasion resistant... the perfect floor for any warehouse.
