

CASE STUDY Wickwood House

Client: Iraj Taghi Custom Homes

Project: 670 sq.ft. garage

Coating: Xpedite Ultra Premium

Color: Cafe Mocha

We are convinced that garages can be spectacular places where people can work and have fun. This two-car garage is an example of a match between function and form.

The floor was primed and coated with a wheat color Uropoxy and broadcasted with Cafe Mocha flakes and left to cure overnight. Next day we applied a polyurethane topcoat.

The garage was not an afterthought. It is an important part of the beautiful setting surrounded by pine trees and manicured lawns. Even the windows fit perfectly into the overall architectural plan.

This garage is no place for a cracked floor and cluttered cabinets. It makes a statement about its owner.
