Moisture-Tolerant Flooring Systems

Hybri-Flex flooring systems were created to help solve the problems of flooring failure due to moisture migration. It tolerates 92% relative humidity.

Hybri-Flex is a decorative, colored quartz, hybrid floor system consisting of a moisture-tolerant urethane base coat and one-hour-curing methyl methacrylate (MMA) topcoats. Thickness up to ¼” provides excellent wear resistance. Hybri-Flex is a 3-element stain and UV resistant high performance system:

BASECOAT

- 3-component pigmented urethane resin
- 3-component urethane hardener
- Crystalline silica aggregate

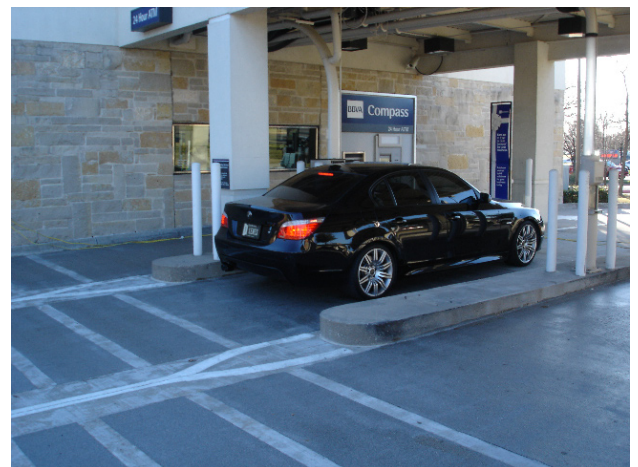

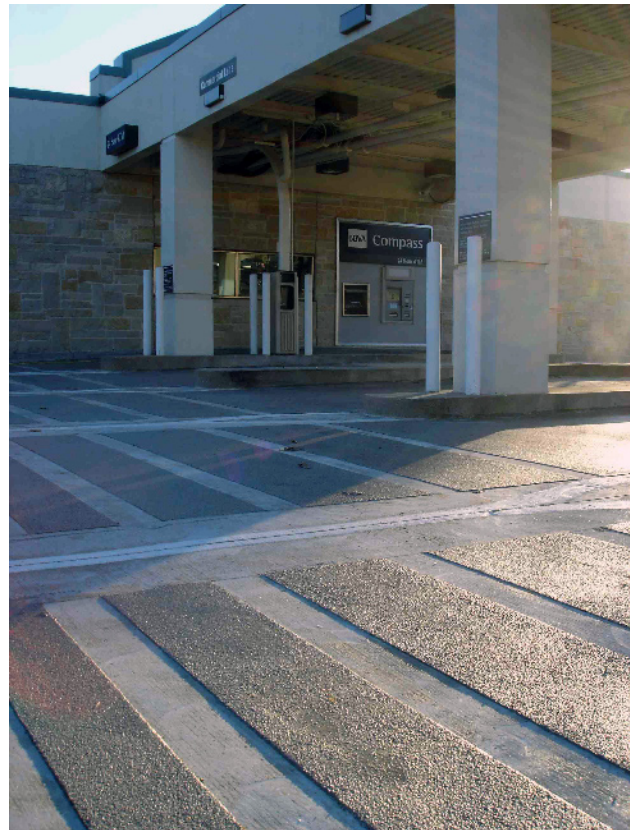

QUARTZ CHIPS

High quality silica in different color combinations

TOPCOAT (applied twice)

- MMA (methyl methacrylate) resin
- 2-component methacrylate sealer

Installation may begin after working hours greatly reducing interruption to business. Return to service next day.
