Polyaspartic Fast Coating System

High-Performance Polyurea Coating

- No VOCs
- Fast curing time
- Rapid return to service
- Designed for heavy duty applications
- UV stable protects coatings from sun
- Outstanding performance in:
 Color & Gloss Retention
 Chemical and abrasion resistance
- 4 times more abrasion resistance than epoxy

Polyaspartic is the latest technology in floor coating. It is 4 times more abrasion resistant than standard epoxy, and cures in under 4 hours.

Return to business the next day

CASE STUDY

West University Place Fleet Maintenance Unit

Incorporated in 1924, West University Place, often called West University or West U for short, is a city located within the Houston-Sugar Land-Baytown metropolitan area and. As of the 2000 U.S. Census, the population of the city was 14,211 and it is the 8th wealthiest location in Texas by per capita income. West University continues to develop as one of the most desirable and affluent parts of the Houston area.

Xpedite Coatings was selected to carry out the Milton Maintenance Facility Floor. We suggested a two-system coating including a 450 sq.ft. area with our Cementitious Urethane System and 780 sq.ft. with a light gray Polyaspartic Fast Curing System. This particular design saves money by coating each area for its intended purpose, while providing a unified seamless coating that is tough, slip-resistant and easy to clean.

GARNER DECONTAMINATION SOLUTIONS

GARNER provides rapid and verifiable biological decontamination services to a variety of industries including Life Sciences, Pharmaceutical, Healthcare, First Responders, Public/Private Transportation and Public Facilities.

Their vehicle decontamination facility located near the Houston Medical Center is capable of safely decontaminating multiple vehicles including ambulances, fire/rescue and police vehicles, school buses, 53' refrigerated trailers, Metro Buses, and other critical assets to surgical sterility in two hours or less. It also provide decontamination of blood borne pathogens typically associated with vehicles involved in accidents.

Xpedite Coatings provided a polyaspartic coating to over 3,000 square feet concrete floor at their new facility in Houston. The job was done in two days, including surface prep and coating. This allowed Garner to operate their facility without delay, 24 hours after job was finished.
